PROCESS: BULKING AND BEDROCK CLEANING

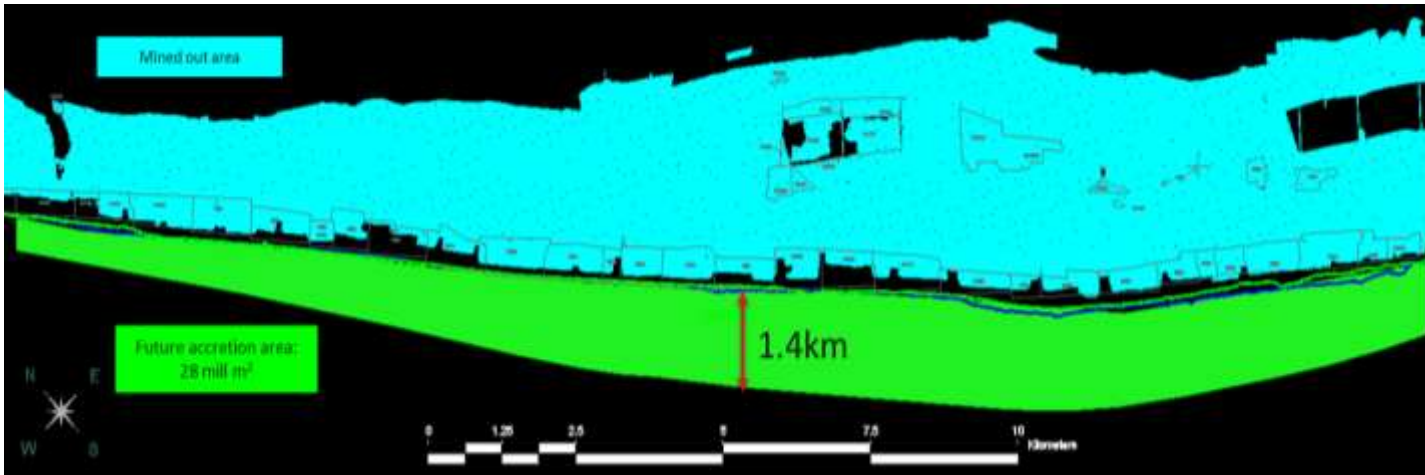

OCT 2021: ANNOUNCEMENT OF A NEW 20-YEAR BUSINESS PLAN

THE 2021 NAMDEB BUSINESS PLAN

Production parameters over LoM	Value
Water pumped	14 billion m ³
Sand deposited into sea	2.2 billion tons
Area Mined	27 million m ²
Carats (million)	8
Contribution to Namibian Fiscus	N\$40 billion

Advantages/Benefits of Namdeb's Long-term Plan

1. Continued employment for 2600 Namibians for 20-year period + off-mine impact.
2. Additional time to grow Oranjemund non-mining economy and to transfer town.
3. Continue to contribute to Namibia's fiscus through revenue gained from delivering high quality gemstones.

SUSTAINABILITY AMBITIONS

NAMDEB INITIATIVES IMPLEMENTED IN RESPONSE TO DIAMOND MARKET DOWNTURN:

- Sale of Namdeb Properties
- Closure of Orange River Mines and rightsizing of support functions post ORM closure
- 3 rounds of Voluntary Separation
- Zero Based Organisational redesign (Complement: **2024 = 1 830** to **2027 = 1 512**)
- Operational efficiency improvements (Improved on LTP targets)
 - Reduce dedicated accretion
 - Increased square meters and tons treated by c.30% in 2024/2025 cycle (exceeded ramp up plan targets)
 - Reduce stripped reserve buffer
 - Reduce fuel litres per ton mined
 - Reduce electricity Kwh per Ton mined
 - G Block dominated plan to maximise revenue
- No contractor escalations in 2025 and no labour escalations
- 2026 Business plan: Focused on higher-revenue mining blocks, limited stripped reserves and further cost reduction

EFFICIENCY IMPROVEMENTS

STRIPPED RESERVE: JAN 2025 – JUL 2026

PEAK RESERVE **445k m²**
24 Jan 2025

LATEST RESERVE **108k m²**
03 Jul 2026

DRAWDOWN FROM PEAK **-75.8%**
