

Appian in Namibia

Creating opportunities with Rosh Pinah Zinc,
Omitiomire Copper and beyond

August 2026

This presentation has been prepared by Appian Capital Advisory ("Appian") for general informational purposes only in connection with a mining industry conference.

It does not constitute an offer, solicitation, or recommendation to buy or sell any securities or to invest in any fund or vehicle managed or advised by Appian, and it should not be relied upon in connection with any investment decision.

Certain statements in this presentation may constitute forward-looking statements, which are based on current expectations and assumptions and are subject to risks and uncertainties; actual results may differ materially.

The information contained herein is provided as at the date of this presentation and is subject to change without notice.

This presentation may not be reproduced or redistributed, in whole or in part, without Appian's prior written consent.

Appian is a leading metals & mining long-term investor

Appian has developed a differentiated model by providing project development and technical expertise

~\$5.0bn¹

Assets under management
(incl. co-investment)

40

Investments made

12

Assets brought
into production

~100

Investment
professionals

~13,000

Employees

Dedicated mining-focused investors

- Fully committed discretionary long-term capital, with co-investment pool
 - Fund consists of small group of long-term investors suited to mine development timelines
- 40 investments made into 24 assets, with 12 assets financed and in production

Experienced and focused investment and technical team

- ~100-person global team with Tier 1 expertise working in the world's largest mining and financial companies
 - Careers with BHP, Anglo American, Rio Tinto, Barrick, Goldman Sachs and J.P. Morgan

In-house development, financing, and operational expertise

- Proven track record of mine finance and value creation through the cycle, able to support management through development
- Built, operated, and expanded 60+ mines globally across commodities and geographies
- Executed and advised on >US\$250bn of mining transactions worldwide

Long-term, collaborative, value maximizing investor

- Long-time horizon (12+ years), matching long-term capital with a long-term industry
- Enabling operational development by providing full funding solution and technical expertise to management teams
- Able to achieve better debt financing terms given cornerstone fully funded nature

Source: Appian Capital Advisory

1. As of April 2026. Includes US\$1.0bn target for the Appian EM Fund

Appian–IFC partnership

Appian successfully launched a dedicated Sidecar fund with the IFC (part of the World Bank Group) as anchor investor

Sidecar fund overview

- Appian has successfully launched a Sidecar fund with the IFC as anchor investor. This is IFC's first investment in a mining fund
 - ▶ IFC has committed US\$100 million to the Sidecar with Appian targeting total capital commitments of up to US\$1 billion
 - ▶ Sidecar to invest alongside main Appian equity and credit funds in all assets that meet the IFC's investment criteria
 - ▶ Minimum of 10% of each qualifying deal will be allocated to the Sidecar, with any further allocation at Appian's discretion
- The Sidecar's first investment was in Atlantic Nickel's Santa Rita mine in Brazil, providing funding for the transition to underground production
- Following the transition, Santa Rita is expected to produce ~30ktpa of NiEq.¹, with a mine life exceeding 30 years

IFC signs to commit investment (October 22, 2025)

Fundraising update

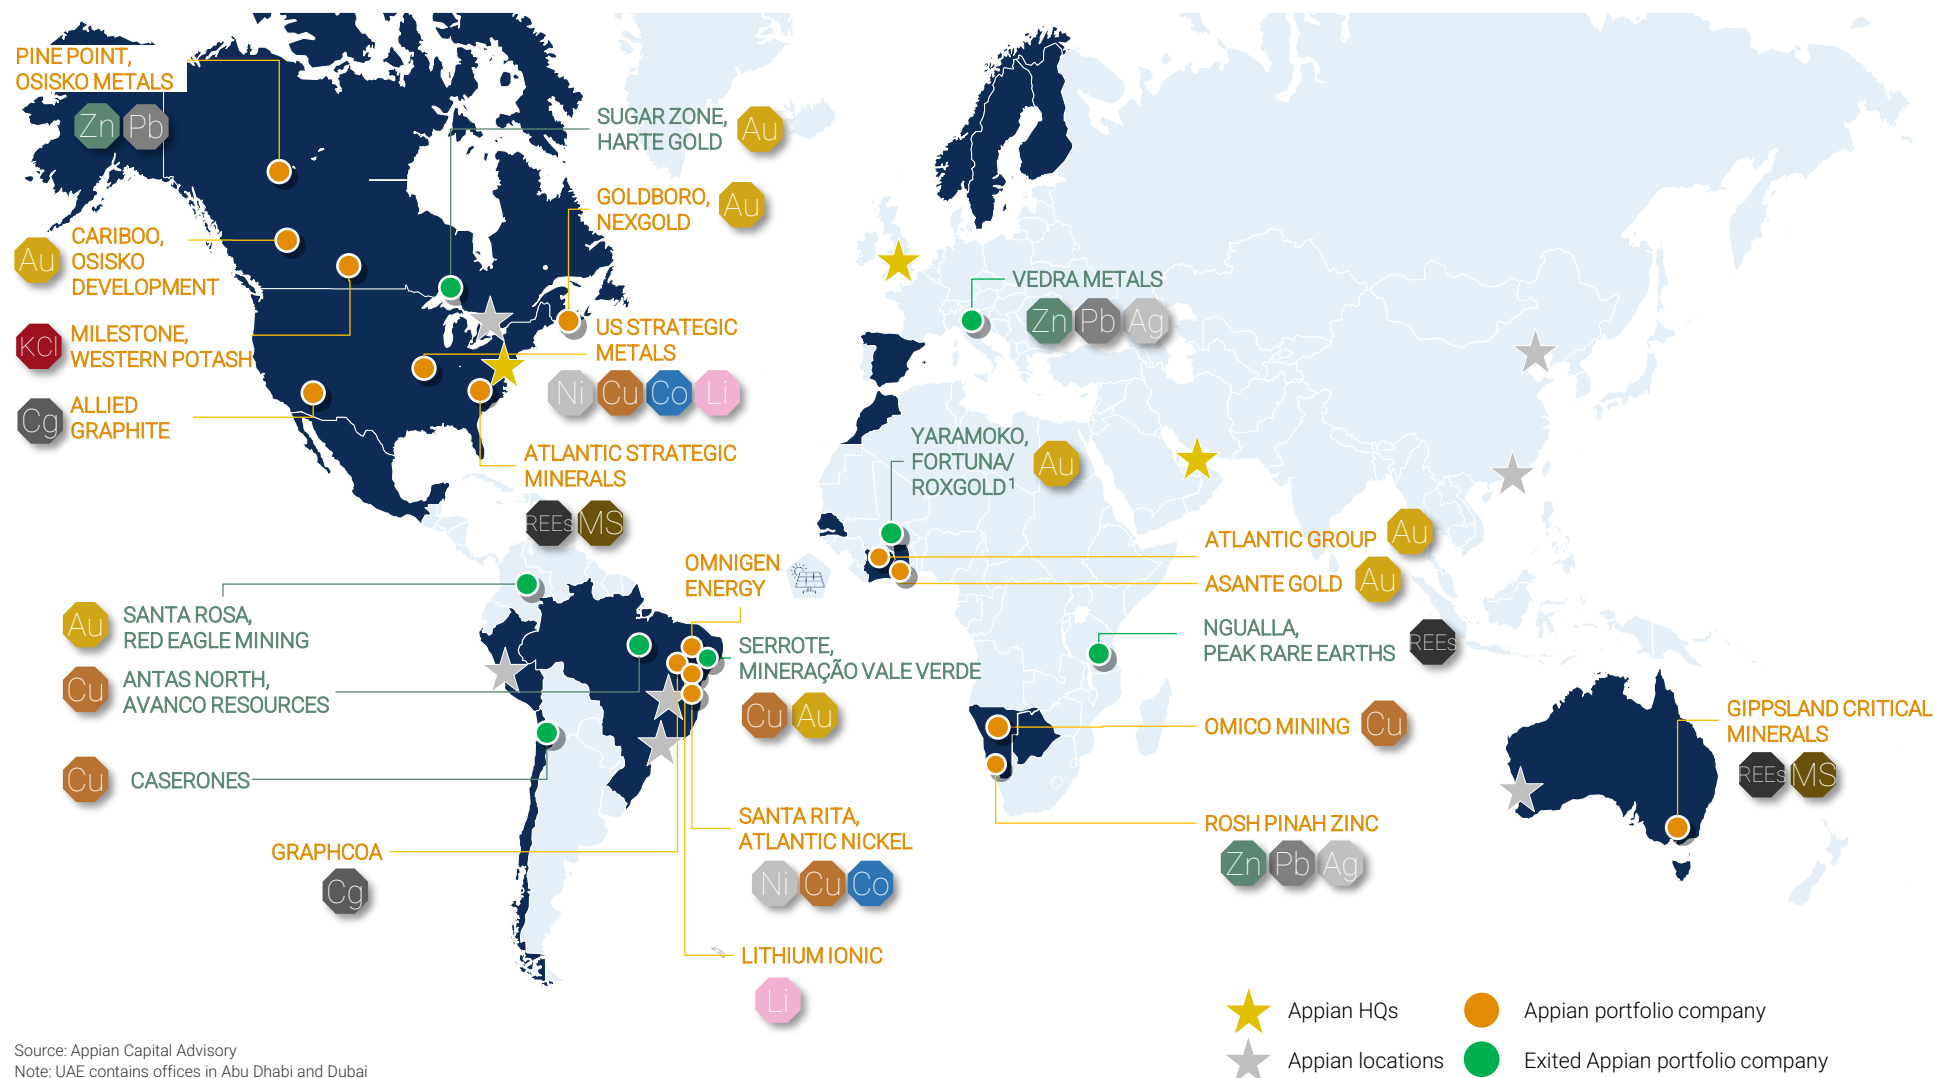

- IFC AMC is currently engaged in discussions with several prospective investors for the separate managed account
- Appian will continue to support IFC AMC in their fundraising discussions

Source: IFC, Appian Capital Advisory

1. NiEq. refers to nickel equivalent, expressing the combined value of all metals produced as an equivalent nickel amount based on relative metal prices

Overview of Appian's global presence and investments

Appian Natural Resources Fund I, II and III have reviewed over 4,500 projects, made 40 investments worldwide across 24 platform assets and financed 12 projects into production

Source: Appian Capital Advisory

Note: UAE contains offices in Abu Dhabi and Dubai

Appian's track record of bringing assets into production

Appian has brought 12 assets into production since 2016, more than 5 of the largest mining companies in terms of operational delivery

Number of assets developed since 2016¹

 = in production in 2024/25

Source: Appian Capital Advisory, S&P Global Market Intelligence, S&P Capital IQ as of May 2025

1. Excludes brownfield expansions

2. Atlantic Strategic Minerals (first production in 2025)

3. Graphco (first production in 2024)

4. Omni (first production in 2024)

5. Western Potash (first production in 2023)

6. Mineração Vale Verde (first production in 2021)

7. Atlantic Nickel (first production in 2019). Appian acquired Atlantic Nickel out of a complex bankruptcy process and identified an opportunity to restart the mine through revised resource estimation, a new mine design consisting of a lower strip ratio open pit followed by a transition to bulk mining underground, and a more defensive operating strategy

8. Roxgold (first production of Yaramoko in 2016, Bagassi in 2019 and Séguéla in 2023)

9. Harte Gold (first production in 2019)

10. Avanco Resources (first production in 2016)

Appian is optimizing the producing Rosh Pinah Zinc mine in Namibia and delivering the RP2.0 expansion, with further upside from in-mine exploration and the development of the Gergarub joint-venture with Vedanta

Investment overview

Ownership	98%
Investment year	2023
Financing type	Equity

Asset overview

Commodity	Zinc, Lead, Silver	Mining method	Underground LHS ²
Country	Namibia		
Stage	Operating (expansion)	Annual production ¹	75 ktpa Zn 13 ktpa Pb 400 koz pa Ag
Mine life	19 years		

- RPZ produces zinc and lead concentrate and trucks it to the port of Lüderitz. Overall stable operating performance since Appian took ownership in Q3 2023
- RP2.0 expansion project will increase ore mining throughput from 0.7 to 1.4Mtpa
 - Modernization and throughput increase will reduce cost
 - Project completion expected in Q4-2026, ramp-up in 2027
- Large exploration program on existing deposits and development of identified near-mine and high-potential exploration targets underway to extend mine life
- Investment has delivered N\$916 million in direct local economic benefit, driving growth and job creation
 - Employment impact: ~1,800 direct jobs, 98% Namibian employment

Education Investment: Provided 20 laptops, 30 computers, resources for local primary and high schools, and US\$74,000 annual funding in Rosh Pinah, enhancing education access, performance, and community skills development. Built a primary school that was handed over to the Ministry of Education but is still being maintained by Rosh Pinah Zinc.

Youth Development: Implemented the Driving School Project, funding lessons and licensing costs for local youth and employees; **100 beneficiaries** gained licenses over two years, boosting employment prospects.

Sustainable Food Production: Collaborated with Emesco Solar Farm to launch an aquaponics/hydroponics system providing food, supporting OVC centers, and generating income to promote self-reliance.

Charitable Donations: Supported local communities with maternity care packs, meals for **50 children**, and **200 blankets**—strengthening health, welfare, and family resilience. Continue to fund full operation (salaries, building, etc) of a local orphanage.

Skills & SME Development: Invested **N\$8M** through the Obib Center to train **45 community members**, support SMEs, and provide **10 business units** with public facilities—driving job creation, literacy, and improved quality of life.

Sustainable Agri-Packaging Projects: Funded pilots in Rosh Pinah (wood biorefinery, carbon black pyrolysis, mycelium packaging), creating **600+ jobs** and advancing community development, sustainable employment, and waste-to-value industrialisation.

Citrus Project: Developing >300 ha near the Orange River with irrigation and post-harvest facilities, creating **30 permanent and 600 seasonal jobs**, boosting sustainable livelihoods and economic resilience.

RP2.0 expansion project

ESG and lead management

Solved lead management and improved safety culture

Implemented lead management and strengthened Health & Safety through new leadership and protocols, remediating historic liabilities and significantly improving mine safety since H2 2023

Mine Emergency Response

First mine in Namibia with trained and certified mine rescue teams

Established two underground PROTO teams and one surface fire team, all trained and certified in rope rescue, fire response, and Class A First Aid

Site management team

Mix of industry veterans and internal talent

Strengthened operations by bringing in an experienced management team with underground paste-fill expertise while promoting local Namibian talent to key leadership roles

Exploration strategy & Regional Upside

Rolled out US\$9m in-mine drilling program

Launched a US\$14m resource expansion program targeting ~8Mt Life-of-Mine growth within 3–4 years, while advancing exploration at Gergarub and EPL 2616

Omitiomire Copper Project | Overview

A long-life, near-term copper asset with strong growth potential, located in north-east Namibia

Asset overview

Commodity (% revenue)	Copper (100%)	Mining method	Open-pit
Region	Khomashana	Avg. annual production	57Mlbs Cu (26kt Cu)
Stage	DFS update	Development capex	~N\$6.8bn
Mine life	16 years	Direct jobs	~800

- The Omitiomire project is an advanced-stage, de-risked copper development approximately 140km north-east of Windhoek with near-term production potential and an advanced permitting position
- The previous owner has progressed the project significantly on studies, testwork and permits. Their stewardship has materially de-risked the project, allowing Appian to now focus on bringing it into production
- The critical path will be defined by the permitting timeline, including the power line permit which requires alignment with NamPower
- The project will generate substantial national benefits through employment, investment and community support, including a 5% shareholding by the Craton Foundation
 - **Community involvement:** To fund independent community initiatives focused on education and social health

Project location

Omitiomire Copper Project | Overview

The project delivers substantial economic and social benefits to local communities and the broader Namibian economy

Long-life copper asset with plans to invest to further advance the Omitiomire project into production

- Mid-scale mine contributing to the global copper market
- Resilient cost position to weather price volatility

Significant contribution to the Namibian economy

- Overall, the project delivers significant economic and social benefits for Namibia, expected capital investment of N\$6.8bn, ~800 direct jobs, and up to ~5,600 indirect jobs
- Strong ESG fundamentals with low environmental impact
- Appian is committed to working to international best practices including IFC Performance Standards

Project enhancement opportunity from Appian's investment plan

- Appian plans to invest further to explore the geological potential of the project to expand the resource and extend mine-life
- Appian's technical arbitrage includes carrying out further studies to change to the flotation processing route
- Operational synergy opportunity with Rosh Pinah

Omitiomire Copper Project | Overview

Strong ESG profile, driven by the site's location and established stakeholder alignment, resulting in a clear pathway to IFC Performance Standards compliance

Community engagement

- ✓ Omitiomire holds regular community engagement with local stakeholders, including the Farmers' Association meetings
- ✓ ESIA and ESMP developed with local and regional stakeholders using IFC Performance Standards as guidelines¹

Environmental

- ✓ Remote site with secured groundwater supply, minimal surface-water interaction and low contamination risk
- ✓ Power supply via a combination of solar and grid, reducing carbon emissions and cost
- ✓ Waste rock is essentially inert, no risk of acidic contamination or deleterious run-off
- ✓ Engagement ongoing with the Farmers' Association for production wells required for the base-case water supply scenario

Social and governmental

- ✓ Once the mine is in production, a steady stream of income will fund independent community initiatives (focus will be on education and social health)
- ✓ Project is 5% owned by the Craton Foundation, a charitable organisation which addresses the social needs in the local area
- ✓ Environmental clearance to construct and operate mine obtained, permitting progressing

NamXplor partnership

Appian is the Founding Strategic Partner of the inaugural **NamXplor Investor Pitch Competition**, with the final being held at the Namibia Mining Expo & Conference tomorrow (August 6th).

The competition has received approximately 20 applications from projects showcasing Namibia's mining potential across a range of commodities.

Why is Appian involved

- Conviction in the existing strengths and the potential growth opportunity of Namibia's metals and mining sector
- To support the development of a credible, technically robust pipeline of exploration and development-stage mining projects in Namibia
- To contribute technical, commercial and investment-readiness expertise
- An opportunity to build a long-term partnership with NIPDB that strengthens Namibia's exploration and broader mining ecosystem

Appian welcomes direct outreach from management teams across Namibia's exploration and mining ecosystem to discuss their projects and investment requirements

Benefits of the program to junior miners

- 1 All applicants had access to Appian's technical, commercial and investment-readiness expertise through a workshop delivered on August 3rd
- 2 Guidance on project presentations, investment materials and investor expectations from an experienced global mining investor - helping the projects bridge the gap between exploration and investment
- 3 Shortlisted projects will pitch to Appian's investment team on the Pitch Forum investor panel, building experience in investor presentations and raising visibility with a wider pool of attending stakeholders
- 4 Exposure to international investment standards and a global investor's network and perspective
