OF NAMIBIA

---

**FROM DIALOGUE TO DELIVERY**  
*CONFERENCE CONTEXT ON MINING'S COMMITMENTS ONE  
YEAR ON FROM NAMPPF*

Mr. George Botshiwe, Chamber President

**Mining Expo and Conference, 2026**

05 AUGUST, 2026

---

# What is NamPPF?

**NamPPF (Namibia Public-Private Forum) - chaired by Her Excellency and convened by the NPC - enables evidence-based dialogue, policy coordination and partnership-driven reform.**

1

## Platform

Aligns government and industry priorities, removes bottlenecks and coordinates reform.

2

## Scope

Covers targeted sectors of the Namibian economy, including mining.

3

## Objective

Coordinates public- and private-sector efforts towards Government's target of creating 500,000 jobs between 2025 and 2030.

**This presentation covers high-level progress in the mining sector since NamPPF and sets the context for the discussions that will follow throughout the conference.**

# Why Delivery Matters: The Sector Carries National Weight

The mining sector remains a key pillar of economic stability, employment, and industrial development.

**14%**

**GDP contribution**

Mining share of the economy in 2025.

**N\$7.8B**

**Fiscal revenue**

Taxes, royalties, levies and PAYE.

**N\$23.9B**

**Local Procurement**

Namibian goods and services procured locally.

**20,798**

**Direct jobs**

Employment supported by large-scale mining.

**145,856**

**Indirect jobs**

Jobs supported across the wider supply chain.

Of the **8,201** permanent employees, **98% are Namibian citizens, while only 2% are expatriates.**

**The delivery question is therefore not whether mining matters, but how quickly we can remove the binding constraints to investment, jobs and local value creation.**

# Projects progressing since NamPPF

During NamPPF, the Chamber outlined a mining project pipeline set to unlock more than **US\$2.865 billion in investment** and create over **18,000 direct jobs** within the next four years.

## Gold Sector Growth

**PROGRESS**

**Osino Resources Twin Hill Mine:** US\$ 500 million  
1,500 Jobs Created

**Navachab underground expansion project**  
U\$ 242 million  
127 Jobs Created

**B2Gold underground expansion project**  
U\$105 million

## Uranium Sector Expansion

**PROGRESS**

**Bannerman's Etango Project:** U\$354 million  
477 Job Created

**Reptile Mineral Resources**  
US\$474 million | 700 jobs

**Husab Leach Project**  
US\$450 million | >500 construction, 100 O&M

## Infrastructure and Processing

**PROGRESS**

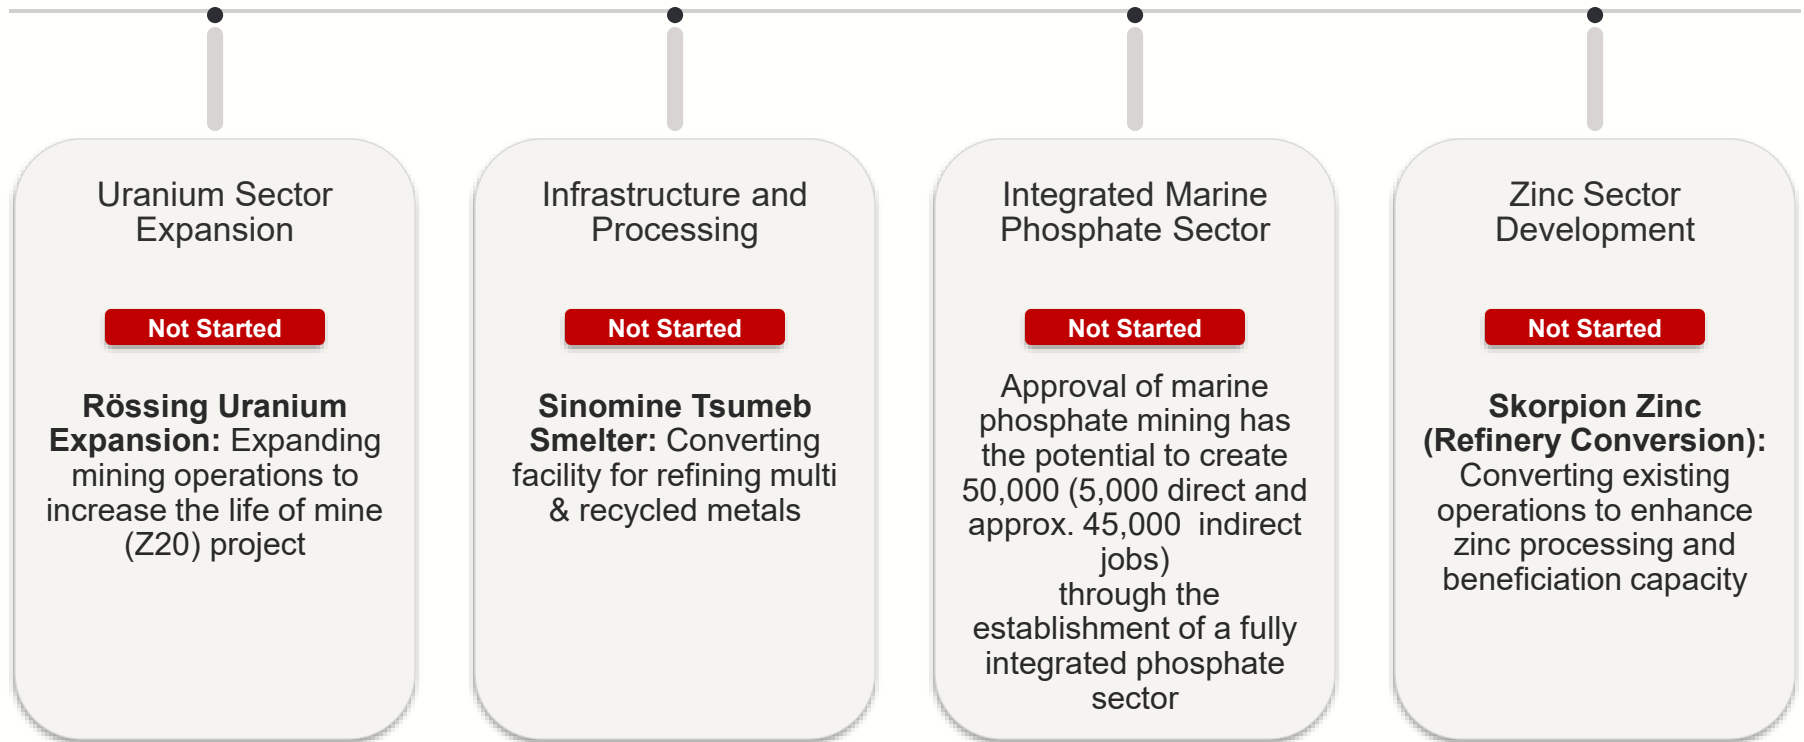

**Husab - NamWater Desalination Plant**  
U\$170 million  
Construction > 500  
100 O&M

**Progress to date: US\$1.86 billion invested and 3,054 jobs created.**

# Projects with no progress since NamPPF

Four priority projects remain stalled and require clear decisions, owners and timelines.

**Delivery priority: resolve the dependencies holding these projects back.**

# Outcomes of NamPPF

The Chamber's contribution at NamPPF was recognised for its credibility and practical focus—grounded in defined projects, investment commitments and realistic timelines.

## 1 Credible contribution

Defined projects, investment commitments and practical timelines gave the Chamber's proposals weight.

## 2 Three task forces

The President announced Economic Recovery, Health and Housing task forces as a direct Forum outcome.

## 3 Mining's delivery channel

Through Economic Recovery task force, the Chamber has and continues to advocate regulatory reform and streamlined licensing to unlock investment and jobs.

# Conclusion: From Dialogue to Delivery

The sector has moved from commitment to action.  
The next phase is to institutionalise delivery and convert the mining pipeline into jobs, local value creation and sustainable growth.

1

## Progress is visible

Mining projects and desalination plant moving from planning into development and construction.

2

## Constraints remain

Policy certainty, regulatory approvals and delays, technical capacity within MIME and MEFT, and power, remain the binding constraints.

3

## Delivery must be coordinated

A formal delivery table and clear timelines are required to sustain momentum.

**The priority now is execution: convert Namibia's remaining mining pipeline into jobs, local value creation and broad-based growth.**

# Thank you
